Presentation

have been following this title a lot, sometimes I had to go back to zero in my Aquaponics, but the main reason was not problems in Aquaponics but because of my profession. I am an Aquaponic lover, but my professional background is Systems Analyst / Accounting.

I manage an internet provider where I currently live, I also provide local and web systems development services and sometimes I receive proposals that make me change cities.

My last city was in Estiva Gerbi, today I live in Mogi Mirim - SP.

At Estiva Gerbi I had the opportunity to always be surrounded by a lot of space for my Aquaponic experiments, which gave me some experience in the area.

Moving to Mogim Mirim - SP, (Estiva Gerbi is also São Paulo I forgot to inform) I came across a problem that should affect a good part of people, I don't have a yard so I can install my water tanks, pipes, my pots and many other things.

If you follow my channel on Facebook or Youtube, Aquaponia Renaldo Ramos will see the amount of junk that I had, I got rid of all the equipment.

So I decided to change the whole process and start from scratch, along with my little experience, I will pass on to you the beginning of Aquaponia in small spaces with more great results.

Message to the Reader

Never forget, nothing in this life is easy, in everything you do, do the best you can, your best even in the smallest of everyday tasks.

You will see how pleasurable it is to develop it with dedication, love and commitment.

I hope you like this work, I tried to keep it as brief as possible, but some articles do not allow us to summarize them too much.

Good reading.

Congratulations

First of all, I thank God, I also have to thank those who did not believe in my ability, and who instead of discouraging me, just pushed me further.
