Introduction to "Creation".

You will probably come to think I am just guessing, but I am not. Explained why in "To Be Spirituel - The Game". Bear over with me in the first really unworked version of theese theories. I remember what it is about in time, by help by the WE. So theres probably corrections along the way and alot of increasement of understandment for me and others. Sorry for any kind of misslead, was and is not the intention. Think I am under the influence of "perception" at the moment. And it has some influence on me. Remember, work in progress. And the fact that "I fuck up too". It is a good thing, as long as it is apart of the process. That you get to a result that makes sence. And in the end, your own knowledge is expanded too. The understandment of what you do becomes more clear. However, this will be the basics of "creation".

Alot of the understandment is done from a "spirituel" perspective. When You put "spirit" into "science".

I encourage you to understand that all of it is "remembering as I go along". I have to re-remember past knowledge that is still not known in reality, it is abit tricky. And as another reminder, this is basic theory. I think the WE figured IT out before me. Well, alot of it, maybe not all.

The start of the shape of "donut" and how calculations are approached, came from a technician working on one of the first energy sources. There are more than one place on earth that this theory is being examined. I instructed what needed done by "thought", at of what I was tolled by the current shape it had. And by co-operation, we figure a shape more appropiate for a donut shape. But the shape that was choosen was humans thinking "big". Think they know now, it is not nessecary to go that "big" with the donut. But basic calculations of the donut came from "thought" and interacting within

that of "spirit". And when that technician first time saw the donut firing up. I saw by thought the image and shape of the donut from that technician and could see what needed correction. Believe he was american.

While I wrote "To Be Spirituel - The Game". I also showed other parts of the theory, that could increase understandment of what it was about. And that was done on and from my personal and private PC. Also why I knew that the shared materials was already copied from my drive.

Alot might ask, why do I not inrich myself if I know this to be true. It go against my true core of spirit. I believe that for me to withhold or let any co-operation as a company hold this kind of knowledge for financial gain, is wrong. I see it as too important for all of us and what it can provide for us all. That why I found it important to share first with Nations. And for some Universities. For the people. As I believe it is supposed to be.

Any version I send out to the ones who has that kind of influence, will be shared so every other nation, that has choosen too be included, will know. Others, like companies and cooperations, will be included when time is up for it. I have no influence on that.

Alot of the "theory" and how I combined everything, would not have been able without humankinds scients and observations. We should all give ourself some credit, for the historical events of scients. Remembering history. I know that alot of "scients" was done by individuals, but would not have been doable without premade historical events of scients and the path thoose individuals was shown.

As You can now see, with this version, my "awareness" of this theoretical approach, has been increased. And now I am more "aware" of what it is about. The scientific part.

I have not planed any of the paths, this theory has taken. The only

thing "planed" in this. Is the approach to the donut shape, that was my path and my start. Combined with knowledge of Rodin coil. But even that, has increased from when I started, not long ago, and every "theory" is created in the now.

You can also see, how I work. A process towards a goal. Even "quantum mechanics" did not know anything about that, before I started. I adapt to the knowledge needed, as I go along and "Go with the flow". As I have explain in the novell, knowledge can be increased by using "awareness". And not so much this "human" illusion of "intelligents". And anyone can really be just as "intelligent" as I seem, just adapt to the use of "awareness" also, and what your "intelligents" or "knowledge gain" over life, tells you. "Spirit" provide with the answers. But the importance is "The Path" you kinda need to have, in order to gain that kind of knowledge you want to gain.

The "Elite" challenged me to do this "theory", some time ago(What was apart of the "elite" amongst "the elite"). They said by thought: If You are so sure of spirit, why do you not provide a "theory" for it.

So I am doing just that. And a challenge is also good experience for yourself. You expand your own borders. As long as it is a "challenge" like this, proving "spirit". I am always up for it. Would not do a "physical" challenge on strenght, that is not my path of challenges. I just need "time" and "possibilities" for it to accure. And, of course, a path.

21-03-2025

There will be some changes an adjustments within this version. Got some things not quite right. As said it is work in progress and a huge "Re-remembering" process.

Sorry for any kind of way You might feel being misslead by earlier versions. Alot of "Wrongs" should now be "Rights".

-Ashtar

08-05-2025

As this "Theory" progresses, even I saw that I made some more "fuckups" so have corrected as of "Now" what I found to be faulty. And will probably do so as I every now and then, go backwards. To see if it is aligning. And figure out why if not.

When I am doing "Theory". I just pound out as much as possible that comes to mind. So I will address that with "Past Live" and "RE-remember". Thats why I get it on paper, can always look if I did any mistakes and something seems faulty.

And also, I am reminded to tell. That even thou I am also working with the "Atom" understandment of "Iron". The math applied, can be used for other "Atoms" but my calculations of mostly only "Iron". Think You will understand along the way.

I will apoligize up front. It can seem abit messsy. But I guarantee, when You get to the end. You will say: Its actually pretty simple, if You know what "Data" You hold.

And I am also pretty sure, that You will wonder how a nobody electrician figures this out. And not "All" the "High" educated level "People". I am very greatful for all the knowledge I also have gained by doing this "Theory". It should be pretty much done. But still an eye on smaller mistake and errors.

26-05-2025

I put in something within the understandment of "Spacetravel". And also reason not to go there yet. But there is a "Basic" of how it is understood.

Hope You Enjoy.

Something about "Frequence".

This is a yet not quitely a done part about "Gravitational force". I am kinda stuck and am sending this part out for now. I need it to go into "the collected conscience", other perspectives than my own on it. And it will be sufficient enough, with people knowing of it. I believe I will be able to tap into the collected and have some aid from there. Remember, just as other "Theories" came to life. It is about me understanding myself also, what it is about.

Hope "The We" are willing to assist by just looking at it.

Ashtar, 30-06-2025

20-07-2025

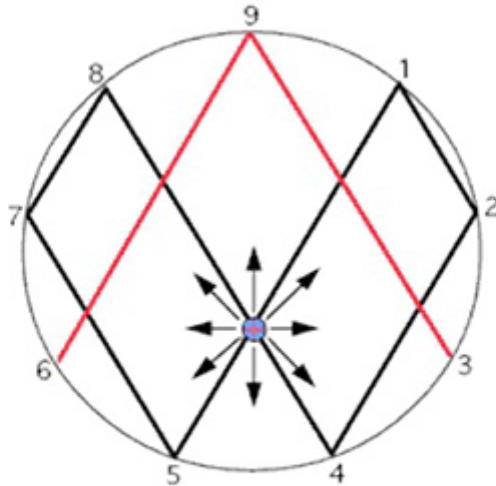

I have send multiple copies around as I have been proceeding with theories of thought. As this is a nothing, nothing has been confirmed or acknowledge, well atleast not yet. So I actually do not have any confirmation of "Right Path" with theese combined theories.

This is the last version of "Basics". Any further additions will be in another part of theories. I do not know what path I will go, but when I get there. I will know, what I will look at being useful. For now, energy is what is needed. And this theory should provide that.

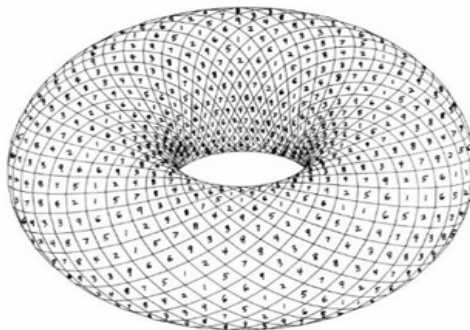

"Energy" from "Spirit" and "Connection" to "collective consciensness"

You need the Rodin Coil design ad understanding and by additional "Vortex Math" theories.

The binding leads are in the laid materials. Look for the bind:

Rodin Vortex-Based Mathematics Energy Schematic

The Rodin Coil Vortex-Based Mathematics Toroid Surface Topology

Calculations of the donut.

The build of the donut form the coil should be vinded around should be in any dimension or scale, the bigger the donut, the bigger energy from "spirit" is drained.

Its preferred to use material of the core from Iron. It is cheap and easy to get in our civilisation. But also because of its "charging" abilities that lays in the magnetic field of its core.

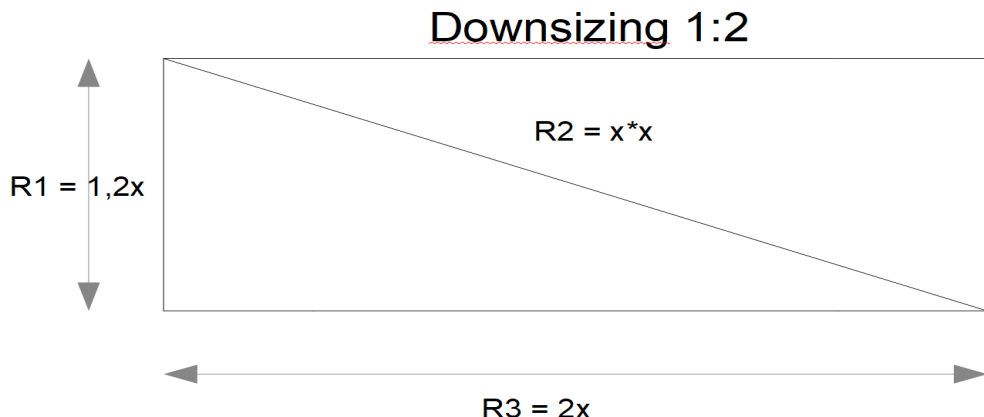

Iron is solid matter in the psysical world. We know that it is always somehow "magnetic" loaded. And that is spirit reacting in reality. That is where we kind of "tap" into spirit and generate energy from the Rodin coil. From the spirit within Iron. And the Iron will continued to "regain" the "lost spirit" from itself. And with spirit there is no "friction", because in spite of light particals is the fastest in the psysical realm, they have friction on earth. Spirit is not a partical, but pure energy.

x being the scale in 1:1 going down. Exampel = 2 = 2 meter.

The Donut, is build on a $R_1: 1,2x$ $R_3: 2x = R_2: 2,33x$ basic scale.

Calculations are from the same basic.

Lets see it from the side:

$R_1: 1,2x$. $R_3: 2x$. $R_2 = xx = x^2$. We know that now.

But however I claim that $\pi = x = \infty = 3,1425$.

$$(x * \pi)^2$$

And that the "matter" or "energy" in its psysical form in mathematical terms $\phi = \infty = 1,618034$

We will look at this on a later point.

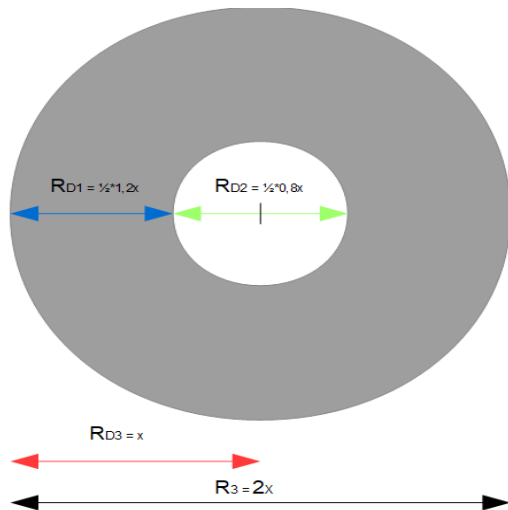

Will now explain how the donut can continued to increase and decrease power output.

Donut seen from top view:

$$R_{D1} = \frac{1}{2} * 1,2x$$

$$R_{D2} = \frac{1}{2} * 0,8x$$

$$R_{D3} = x$$

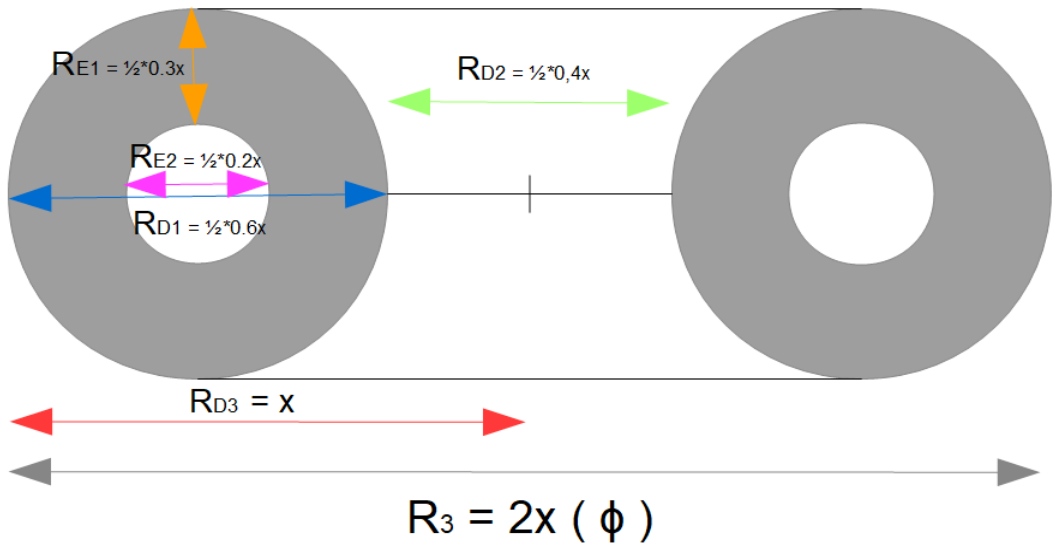

R_{D1} : Explanation of the pull you want or increase of it. And goes on and on. Ex. $R_{E1}, R_{F1} \dots$ "To an atomic level" and "bits".

R_{D2} : Explanation of the pull decrease you want. And goes on and on. Ex. $R_{E2}, R_{F2} \dots$ "To an atomic level" and "bits".

R_{D3} : Explanation of the power you get. And goes on and on. Ex. $R_{E3}, R_{F3} \dots$ "From an atomic level".

The donut cut over and seen from that point.

That most mean that:

$$\otimes = R_{E1} * R_{E2} / R_{E3} \approx \varphi \approx 0,6 = P_{\infty^-} = x$$

$$\otimes = R_{D1} * R_{D2} / R_{D3} \approx \varphi \approx 1,12 = P_{\infty^-} = x$$

$$\otimes = R_1 * R_2 / R_3 \approx \varphi \approx 3,1299 = P_{\infty^-} = x$$

Or

$$\otimes = -R_1 * -R_2 / -R_3 \approx 3,1425 \approx \pi = P_{\infty^+} = x$$

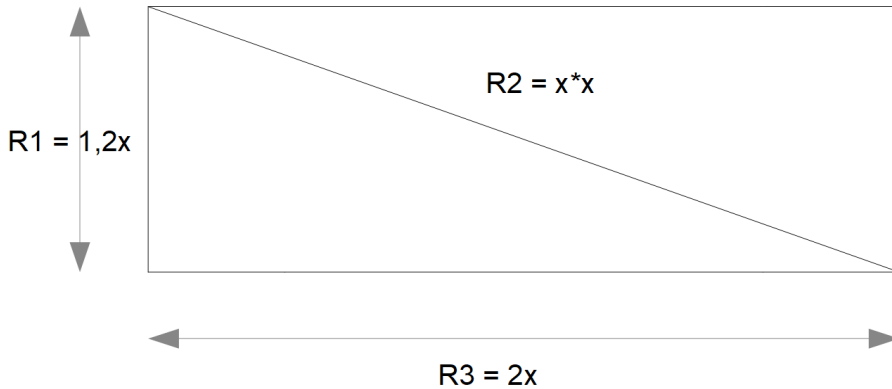

Witch is also π and a mathematical way of proving it. So I just proved π .

$$\otimes = -R_{D1} * -R_{D2} / -R_{D3} \approx 2,413517 \approx \pi = P_{\infty^+} = x$$

$$\otimes = -R_{E1} * -R_{E2} / -R_{E3} \approx 1,508448 \approx \pi = P_{\infty^+} = x$$

Let us see if we can find R_2 .

Downsizing 1:2

Lets take a look at the side from the donut and use the understandment of pythagoras. Pythagoras statement is that $a^2 + b^2 = c^2$. So let us apply that, just in a "Donutcalculation" form going $a^2 \cdot b^2 = c^2$:

$$R_1^2 \cdot R_3^2 = R_2^2$$

And I claimed that the mathematical number of "spirit" could be $\pi = 3,1425 = x$, so lets apply that into that understandment of what we know now.

$$(1,2 \cdot \pi)^2 \cdot (2 \cdot \pi)^2 = R_2^2$$

$$R_2^2 = (1,2 \cdot \pi)^2 \cdot (0,8 \cdot \pi)^2$$

$$R_2^2 = (1,2 \cdot 3,1425)^2 \cdot (0,8 \cdot 3,1425)^2 = \frac{\sqrt{53,6906479}}{3,1425} = 2,33238$$

Lets see if it is somesort of accurate with π on R_1^2 or R_3^2 now we now that,

$$R_2^2 = 2,33238.$$

However we know that π is actually an infinite number, so I round that to 2,33, so

$$R_2^2 = 2,33.$$

$$R_3 = (R_2)^2 - (R_1)^2 = (2,33 * \pi)^2 - (1,2 * \pi)^2 = 53,696479 - 14,21223 = 39,484249$$

$$\frac{39,484249}{3,1425} = 12,5682268 = R_3^2 \approx R_{D3} = 3,14205 = \text{Golden ratio number in another form.}$$

$$\otimes = R_{D1} * R_{D2} / R_{D3} = 1$$

Then "spirit" or "energy" must be:

$$\otimes = (1,2 * \pi) * (0,8 * \pi) / \varphi = 3,0159 \approx 3$$

As $\pi = \infty$, so it is hard to say when to stop putting numbers behind. It is infinite. $\pi = \infty = 3,1425$.

But do it have its counterpart? I also claim that "darkmatter" or just "matter" have a mathematical number and that is:

$$\varphi = 1,618034: \text{The golden ratio}$$

And

$$(x * \pi)^2 \approx \pi^3$$

$$\pi^3 = (\pi * \pi * \pi) = (3,1425 * 3,1425 * 3,1425) = 31,006 \approx 31$$

$$\sqrt{31,006} = 5,568$$

So lets replace x with φ .

$$(\varphi * \pi)^2 = 1,6182 * \pi^2 = 15,969$$

$$\sqrt{15,969} = 3,99612 \approx 4 \text{ and } 4 = 2^2$$

And

$$(\varphi * \pi)^2 = R_3^2 = 25,8389601.$$

And is the "Sizing" of pairs in half the "Iron Atom".

Is "2x" not the scaling metode to increasing or decrease scales on

donut calculations more accurate. So not only do Donut calculation apply π but also match up with φ (The golden cut).

So I proved both φ and π . However $(1,2 * \pi)^2 * (2 * \pi)^2 = R_2^2$ needs abit correction, now we know that is not $2 * \pi$ but $2 * \varphi$. So $(1,2 * \pi)^2 * (2 * \varphi)^2 = "47,3877835 \text{ eVs}"$.

This is the numbers used, $\varphi = 3,1405$, when doing this calculation on something called "eVs" "A indication of "Creation" being that $R_2^2 = 2,33$ the numbers of φ will be 3,1405. Making it almost "Eternal" because of the "0".

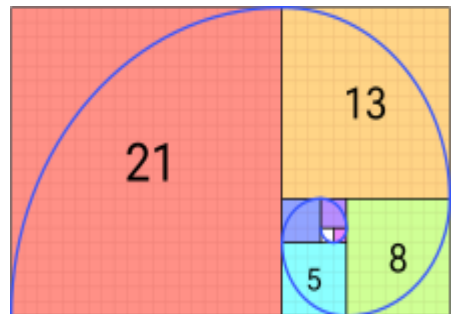

But φ is claimed to be with the "Fibonacci sequence", which is also an on-going endless spiral. So it most also be endless in its numbers.

The Fibonacci sequence goes 0-1-1-2-3-5-8-13-21-34-55-... aso.

On a continued spiral like sequence.

And that is why it does not have the biggest importances when You look at $(1,2 * \pi)^2 * (2 * \varphi)^2 = R_2^2$. Its just more accurrate when You use $\varphi = 1,618034$ at is truest form as possible, just like $\pi = 3,1425$. As many decimals as possible. Especially when You do calculations on a atomic level. We will look into this on another part of the theory.

I am showing this, why? It is infinitive, thats the reason. Believe it has to do with some multiplications of a "Light Partical" from "Quarks".

Fibonacci sequence. From wikipedia

Command lines Horizontal: How to make the winding of donut.

Command lines Horizontal: How to make the winding of donut.

The winding of coil and its importance.

And here lays how to bind the coil. I've Marked the patterns that needs following. As You can see they are all marked 33966933966933966933 aso, those marked with blue. This is the other of the elements You need to kind of bind to "spirit". Along with the creation of the donut.

The windings purpose around the donut is to "charge" the matter is surrounds. So when the material is fully "feed". When the matter is "feed" all the "energy" charging within the donut core, becomes usable energy. The "curcuit" for the energy output can be taken from the end of the winding at the number 3 and 3 (Output).

Look at the other rows in the schematic of vinding the coil. The numbers goes opposite of each other.

Like the ones marked with blue opposite with the row thats unmarked.

Those that are marked blue goes 1,2,4,8,7,5 on a continued loop and always is increase of pull.

$$C_1 = 1+2+4+8+7+5 = 27 \text{ and } 2+7 = 9 = P_{19}$$

And the unmarked are the decrease of pull because the loop is 1,5,7,8,4,2

$$C_2 = 1+5+7+8+4+2 = 27 \text{ and } 2+7 = 9 = P_{29}$$

And power line is 339669

$$C_3 = (3+3+9+6+6+9) = 36 \text{ and } 3+6 = 9 = P_{39}$$

But how to apply the winding on the donut?
